SABDHAGIRI MANIKANDAN GOVINDARAJU

Cloud Platform, DevOps & Site Reliability Engineer

Dublin, CA 94568 (SF Bay Area) • (408) 228-7254 • sabdhagiri@gmail.com • linkedin.com/in/sabdhagiri-govindaraju

Career Summary

Cloud Platform, DevOps and Site Reliability Engineer with **15+ years of experience** architecting, scaling, and governing highly available, multi-cloud distributed systems across AWS, Google Cloud (GCP), Microsoft Azure, and OpenStack. Proven technical leader at ServiceNow, Cisco Meraki, STRIVR Labs, and Tesla Motors (via iOPEX) driving organizational cloud strategy, 99.99% production Kubernetes/EKS reliability, Infrastructure-as-Code (IaC) automation, and distributed backend engineering in Python and C#. Specializes in building self-healing platform foundations, high-concurrency observability and FinOps portals, and automated CI/CD/DevSecOps guardrails that eliminate operational toil across global engineering organizations.

CORE TECHNICAL & LEADERSHIP COMPETENCIES

- **Cloud & Container Orchestration:** AWS (EKS, ELB/NLB, IAM, VPC), Google Cloud Platform (GKE, Cloud Logging/Stackdriver), Microsoft Azure (AKS), OpenStack, Kubernetes, Docker, Helm, VMware vSphere/ESXi
- **Infrastructure as Code, GitOps & CI/CD:** Terraform, Ansible, Python Fabric, Jenkins, Azure DevOps Pipelines, GitHub Actions, Gerrit, Git, Apache Airflow, Blue-Green & Canary Progressive Delivery
- **Distributed Systems & Backend Engineering:** Python (Flask, Celery, Eventlets, python-socketio), C# (ASP.NET Core), JavaScript (Node.js/Express), Bash/Shell, RESTful APIs, RabbitMQ, Redis Pub/Sub, MySQL, PostgreSQL
- **Observability, SRE & Incident Command:** Prometheus, Grafana, Splunk (Advanced SPL), ELK/EFK Stack, Icinga, Nagios, Graphite, Site24×7, SLI/SLO Governance, Error Budgets, Root Cause Analysis (RCA)
- **Cloud Governance, FinOps & DevSecOps:** Cloud Center of Excellence (CCoE), ServiceNow ITOM & Cloud Discovery (CMDB), Cloud Cost Optimization & Right-Sizing, SonarQube, WhiteSource (Mend) OSS Risk Management

PROFESSIONAL EXPERIENCE

ServiceNow - Staff Cloud DevOps Engineer, DT TechOps (April 2022 – Present)

- **Enterprise Cloud Center of Excellence (CCoE) Leadership:** Lead architectural policies, multi-cloud governance standards, and automated provisioning workflows for public cloud adoption across AWS and Azure within the global enterprise.
- **High-Concurrency Cloud Metrics & FinOps Portal:** Designed and engineered an enterprise Cloud Metrics Portal tracking real-time operational KPIs, cloud spend, provisioning SLAs, and infrastructure health across multi-cloud environments.
- **Automated Cloud Discovery & Right-Sizing Governance:** Engineered automated Cloud Discovery and CMDB governance pipelines across AWS and Azure, achieving **100% CMDB accuracy** and driving automated resource right-sizing to reduce cloud operational overhead.
- **Self-Service Platform Automation & Cross-Functional Leadership:** Directed a cross-functional team of engineers and contractors to architect and deploy self-service catalog workflows on the ServiceNow Platform, eliminating repetitive manual cloud provisioning tasks.

Cisco Meraki - Senior Site Reliability Engineer, Cloud Platform (April 2021 – April 2022)

- **Mission-Critical Kubernetes Reliability (99.99% Uptime):** Owned production availability and resilience for multi-tenant AWS EKS clusters powering core backend services and management dashboards for millions of globally distributed edge network devices.
- **Progressive Delivery & Traffic Engineering:** Automated complex L4/L7 traffic management using AWS ELBs and NLBs to enable seamless blue-green cluster upgrades and automated canary traffic splitting.
- **Cluster Governance & Zero-Touch Security:** Implemented robust EKS cluster governance, including automated TLS certificate rotation and internal/external DNS management, enforcing encrypted communication across service boundaries.
- **Workload Modernization & Incident Command:** Guided product engineering teams through containerization and legacy-to-Kubernetes migrations while serving in tier-1 platform on-call rotations to resolve complex distributed systems incidents.

STRIVR Labs Inc. - Senior DevOps & Deployments Engineer (April 2019 – April 2021)

- **Global Edge Fleet Lifecycle & Content Delivery Platform:** Orchestrated software and content lifecycle management for global fleets of enterprise VR headsets; re-architected standalone Python and Ansible deployment scripts into a centralized, production-grade Content Management Service.
- **Cloud Infrastructure & Backend API Engineering:** Operated production services on Google Cloud Platform (GCP), wrote backend REST API controllers in C# ASP.NET Core, and architected automated CI/CD release pipelines in Azure DevOps.

- **Kubernetes Data Pipelines & ETL Automation:** Partnered with Data and Analytics teams to containerize and automate complex ETL workflows using Kubernetes and Apache Airflow, significantly reducing data processing latency.
- **DevSecOps Supply-Chain Integration:** Advanced release security by integrating WhiteSource (Mend.io) open-source vulnerability/license scanning and SonarQube static code analysis directly into automated build pipelines.

ePlus Technology Inc. - Senior Software Architect (May 2017 – April 2019)

- **End-to-End Platform Architecture (Post-Acquisition of OneCloud):** Transitioned to Senior Software Architect following ePlus's acquisition of OneCloud Consulting, driving software architecture lifecycles, coding standards, and design patterns for enterprise cloud solutions.
- **Production Readiness & Disaster Recovery:** Authored technical specifications, system operations guides, and disaster recovery (DR) plans while leading application deployment automation, performance tuning, and defect resolution.

OneCloud Consulting Inc. - Software Developer, Cloud & DevOps (January 2015 – May 2017)

- **OpenStack Cloud Automation & Distributed Tooling:** Engineered cloud automation scripts and tooling on top of OpenStack APIs and Python clients, utilizing Ansible for configuration management and Jenkins/Gerrit/GitHub for CI/CD.
- **Asynchronous Microservices Architecture:** Developed containerized Python/Flask microservices and asynchronous distributed task pipelines using RabbitMQ, Redis Pub/Sub, Celery, Eventlets, and python-socketio.

iOPEX Technologies Inc. - R&D Engineer to Senior DevOps Engineer (June 2009 – January 2015)

- **Embedded DevOps Engineering at Tesla Motors:** Worked on-site at Tesla Motors as a DevOps Engineer, building a centralized server inventory and automated network discovery platform using Python (Flask, Fabric), VMware vCenter/vSphere SDK, JavaScript, and MySQL.
- **Large-Scale Infrastructure Observability:** Architected and maintained open-source Icinga network monitoring across **2,500+ devices and 7,000+ services** for an automotive enterprise client, authoring custom Python monitoring plugins and automated remediation scripts.
- **High-Availability Backend & Database Engineering:** Engineered backend database code, ETL migration pipelines, and tuned SQL stored procedures for an in-house Incident Management platform (Java, ZKOSS AJAX, MySQL), leading customer deployments and RCA investigations.

EDUCATION

- **Bachelor of Engineering (B.E.) in Computer Science and Engineering** — Anna University (August 2005 – May 2009)
